SUMMARY

Software Engineer with 3+ years of experience designing and delivering scalable, secure full-stack applications across backend, frontend, and cloud environments. Experienced in C#, SQL, React, RESTful APIs, and AWS, with a proven track record of building systems for millions of users, improving system reliability, automating workflows, and optimizing data accuracy. Strong collaborator in Agile teams, skilled in API design, cloud integration, and production-grade software delivery.

EDUCATION

Stony Brook University | *Bachelors of Science in Computer Engineering - Cum Laude, Dean's List*

May 2022

EXPERIENCE

Software Developer & Implementation Consultant | *Fast Enterprises*

Aug 2023 - Present

- Modernized tax processing systems for 2M+ users by engineering C# and SQL solutions, improving efficiency, security, and scalability
- Engineered an online guest payment plan system using C# and SQL, enabling self-enrollment for 2M+ taxpayers, streamlining payment workflow automation, reducing manual intervention, and enhancing system reliability, security, and adoption metrics
- Developed and maintained full-stack applications using C#, SQL, optimizing data retrieval, persistence, and system integrations
- Led a backend C# data ingestion pipeline for the FuelTrac API, managing schema mapping, transformations, and error handling across the full software development lifecycle, including requirements gathering, design, implementation, testing, and deployment
- Built SQL validation and reconciliation tools to compare FuelTrac data against tax return records, generating audit reports and improving compliance accuracy, while collaborating with developers, QA, analysts, and product managers in Agile teams
- Collaborated cross-functionally with developers, QA, analysts, and product managers in Agile/Scrum teams to define requirements, produce technical specifications, and deliver high-quality software on schedule

Software Engineering Fellow | *Headstarter AI*

May 2023 - July 2023

- Selected for a competitive software engineering fellowship with mentorship from engineers at Amazon, Bloomberg, and Capital One
- Built and shipped full-stack applications with modern frameworks and cloud tools, emphasizing clean architecture, scalability, and code quality, while strengthening skills in data structures, system design, debugging, and collaboration

PROJECTS

Sentinel Risk Engine (Transactions Dashboard) | *React, JavaScript, Node.js, Express, PostgreSQL, REST APIs, Python, Vercel*

- Built a full-stack AML transaction dashboard that evaluates financial activity using anomaly indicators to flag high-risk transactions
- Developed REST APIs and relational database schemas for transaction ingestion, querying, and real-time risk analysis dashboards

Recipe Share | *Android Studio, Java, APIs, Database, Google Cloud*

- Designed and developed a multi-user Android recipe-sharing application using Android Studio and Java
- Integrated Spoonacular API and Google Sign-In, enabling likes, comments, and real-time user interactions via Firebase
- Designed scalable backend data models for user-generated content and activity tracking

Tech Incubator (Talent Match) | *Visual Studio, HTML, CSS, JavaScript, React.js, Bootstrap, Firebase*

- Developed a task management web application using React.js, Vite, HTML/CSS, and Bootstrap
- Implemented OAuth 2.0 authentication and integrated Firebase backend services for real-time data storage and updates
- Designed end-to-end CRUD workflows, managed UI state, and deployed a production-ready build to cloud hosting

CERTIFICATIONS AND SKILLS

Certifications

AWS Certified Cloud Practitioner (CLF-C02)

Frameworks & Libraries

React.js, Node.js, Express.js, Bootstrap, jQuery, Mongoose
RESTful APIs, SOAP APIs, JSON

Cloud & DevOps Tools

AWS (EC2, S3, Lambda), Docker, Kubernetes

Additional Projects & Leadership

PR Director, IEEE Stony Brook Chapter
Wordle Clone, Full-Stack Blogging App, Newsletter Page
Tindog (Pet Matching App), To-Do List Manager

Languages

English, Mandarin, Fuzhounese

Programming Languages

Python, Java, C#, JavaScript, SQL, HTML5, CSS3, VB.NET

Software Engineering Practices

OOP, Agile/Scrum, Test-Driven Development (TDD)
API Design & Integration, Full-Stack Development, Version Control

Databases

SQL Server (SSMS), MongoDB, MySQL, PostgreSQL

Tools & Platforms

Visual Studio, VS Code, Postman
Android Studio, SQL Server Management Studio
