EDUCATION

Stony Brook University

Bachelors of Science in Computer Engineering - Cum Laude, Dean's List

May 2022

EXPERIENCE

Software Developer & Implementation Consultant | [Fast Enterprises](#)

Aug 2023 - Current

- Modernized tax processing systems for 2M+ taxpayers for the City of Kansas City, Missouri by engineering C# and SQL-based solutions to enhance efficiency, security, and scalability.
- Designed, configured, and tested an online guest payment plan system, enabling taxpayers to self-enroll in payment plans
- Developed full stack applications in C# with SQL databases, optimizing data retrieval, storage, and integration across all systems.
- Collaborated in Agile teams with developers, analysts, QA, stakeholders, and digital product managers to define requirements, create technical specifications, and deliver high-quality full-stack software solutions.
- Led and engineered a C# backend data pipeline to automate FuelTrac API ingestion, mapping data into a warehouse and database table with robust error handling, improving system reliability and data processing efficiency.
- Built SQL validation and comparison tools to reconcile FuelTrac data with tax return records, detecting discrepancies and generating automated audit reports, resulting in higher data accuracy and improved compliance enforcement.

Software Engineering Fellow | [Headstarter](#)

May 2023 - July 2023

- Completed the Headstarter Software Engineering Fellowship, receiving mentorship from engineers at Amazon, Bloomberg, and Capital One while building real-world, industry-focused projects using modern development practices, strengthening skills in full-stack development, scalable system design, problem-solving, and code quality.

PROJECTS

Recipe Share | [Android Studio](#), [Java](#), [APIs](#), [Database](#), [Google Cloud](#)

- Designed and developed a recipe-sharing mobile application in Android Studio using the Spoonacular API, implementing Google Sign-In, multi-user functionality, and like/comment features with Firebase and Google Cloud for authentication, data storage, and real-time user interactions.

Tech Incubator (Talent Match) | [Visual Studio](#), [HTML](#), [CSS](#), [JavaScript](#), [React.js](#), [Bootstrap](#), [Firebase](#)

- Developed a company-employee task management web application using Vite, React.js, HTML/CSS, and OAuth 2.0 for secure authentication, integrating Firebase as the backend to enable real-time data storage, task updates/deletions, and seamless user interaction. <https://tech-incubator.vercel.app/>

Data Aggregator (Weather) | [Visual Studio](#), [HTML](#), [CSS](#), [JavaScript](#), [React.js](#), [Bootstrap](#), [APIs](#)

- Built a React weather/news app using OpenWeather, Open-Meteo, and Newsletter APIs to display real-time weather, air quality, and top news headlines based on user location.

SKILLS

Additional Projects & Mentions: PR Director, IEEE Stony Brook Chapter | Wordle Clone (HTML/CSS/JS) | Full-Stack Blogging Application | Responsive Newsletter Signup Page | Tindog (Pet Matching App) | To-Do List Manager | Functional Drone

Programming Languages: Python, Java, C, C++, C#, JavaScript (ES6+), SQL, HTML5, CSS3, VB.NET

Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap, jQuery, Mongoose, RESTful APIs, SOAP APIs, JSON

Databases: SQL Server (SSMS), MongoDB, MySQL, PostgreSQL

Software Development Practices: Object-Oriented Programming (OOP), Agile/Scrum, Test-Driven Development (TDD), Version Control (Git), MVC Architecture, API Development & Integration, Full Stack Development

Cloud & DevOps Tools: AWS (EC2, S3, Lambda), Docker (basic), Git, GitHub, GitHub Actions (CI/CD), Linux/Unix, Bash

Tools & Platforms: Visual Studio, VS Code, Postman, Android Studio, SQL Server Management Studio (SSMS)

Soft Skills: Adaptability, Problem Solving, Teamwork & Collaboration, Clear Communication, Critical Thinking

Languages: English, Mandarin, Fuzhounese
